

OpenEd Features and Scope Document

Purpose

This document defines what OpenEd v1 includes, what it excludes, and what should be phased later. The goal is to prevent product sprawl while still building a complete v1 with learner app, educator studio, and assessment/proof engine.

V1 feature summary

Product surface	V1 features
Learner App	Auth, course catalog, dashboard, lesson workspace, AI tutor, sources, quizzes, artifacts, progress, SkillProof portfolio.
Educator Studio	Course draft, lesson editor, source cards, media fields, quiz builder, rubric builder, artifact template, publish-readiness QA.
Assessment and Proof Engine	Quiz attempts, feedback, artifact submissions, rubric scores, revision states, portfolio proof levels.
OpenEd Team Console	Course review queue, content QA, source QA, abuse reports, role management, aggregate metrics.

Must-have v1

Learner

- Signup/login.
- Enroll in FME course.
- Resume learning.
- Lesson screen with video/text/source/tutor/practice/build tabs.
- BYOK setup and mock/no-key fallback.
- Progress tracking.
- Quiz attempts with explanations.
- Artifact submission and save state.
- SkillProof portfolio.

Educator

- Educator onboarding.
- Course outline builder.
- Lesson builder.
- Source card editor.
- Quiz builder.
- Rubric builder.
- Artifact builder template.
- Preview as learner.
- Publish-readiness QA.
- Submit for review.

Assessment/proof

- Quiz engine.
- Question bank model.
- Attempt history.
- Artifact schema.
- Rubric schema.
- Feedback state.
- Revision history.
- Proof levels.

Platform team

- Review dashboard.
- Course approval status.
- Report queue.
- Role management.
- Audit log.

Should-have v1.1

- Google login.
- AI-assisted educator content drafting.
- Better source ingestion.
- Basic semantic search across course sources.

- Tutor answer rating and failure reports.
- Peer feedback optional.
- Course import/export format.
- Public portfolio sharing.
- More polished mobile gestures.

Could-have later

- University portal.
- Organization portal.
- Employer proof view.
- Paid verified assessment.
- Live cohorts.
- Community forums.
- Mentorship marketplace.
- Full proctoring.
- SCORM/LTI.
- LMS migration tools.
- Multi-language course authoring.

Won't-have in v1

- Employer dashboards.
- Marketplace payments.
- Institution SSO.
- Full LMS gradebook.
- Proctored high-stakes exams.
- Automatic certification that claims job readiness.
- External video frame analysis for videos OpenEd cannot legally or technically access.
- Hidden storage of BYOK keys on OpenEd servers.

Scope boundaries

AI tutor

V1 tutor can:

- Explain course concepts.
- Answer from lesson/source context.
- Ask Socratic questions.
- Provide hints.
- Give quiz explanations.
- Help interpret rubric fields.
- Suggest next learning steps.

V1 tutor should not:

- Guarantee correctness.
- Grade high-stakes submissions alone.
- Bypass learning by giving direct final answers where the goal is practice.
- Access hidden video visuals without provided transcript/frames/metadata.
- Store learner API keys on server.

Assessment

V1 assessment can:

- Track quizzes.
- Capture artifacts.
- Apply rubrics.
- Show feedback.
- Build proof portfolio.

V1 assessment should not:

- Claim fraud-proof certification.
- Replace human grading for high-stakes credentials.
- Use invasive proctoring.

Educator Studio

V1 Studio can:

- Create structured courses.

- Enforce content completeness.
- Run QA checks.
- Submit for review.

V1 Studio should not:

- Auto-generate entire courses without educator responsibility.
- Publish courses without review.
- Become a full video-hosting CDN unless needed later.

Feature prioritization method

Use this rule:

Build first if it improves the learning loop, proof loop, or course quality loop.
Delay if it primarily improves marketplace scale, enterprise admin, or monetization.

Source notes

This document is grounded in the current OpenEd/FME project context and the following reference set where applicable:

- Uploaded Frontier Model Evaluations prototype code bundle, latest inspected bundle: Design System for Frontier Model Evaluation (5).zip.
- Uploaded Frontier Model Evaluations 51-hour curriculum and Module 1 foundations files.
- Coursera, Udemy, DataCamp, Moodle, Khanmigo, Duolingo public documentation and product pages.
- Supabase Auth and Row Level Security documentation.
- OpenAI API key safety guidance, MDN Web APIs, and YouTube IFrame Player API documentation.
- Bloom's 2 sigma problem, intelligent tutoring systems research, CourseAssist, LearnLM-Tutor, DCCI, and UNESCO guidance for generative AI in education.
